

# Integration of renewable energy sources into the electrical grid

## High Level Conference

May 17th 2018  
Sevilla

**Venue:**

Hotel Ribera de Triana  
Plaza de Chapina, S/N, 41010 Sevilla (SPAIN)

Registration link: <https://goo.gl/forms/ujF8glKMQo3NtGQ42>

## Purpose

A «High Level Conference» will take place in the framework of the European Cooperation Network on Energy Transition in Electricity, TR@NSENER project. This Conference is organised by Corporación Tecnológica de Andalucía (CTA) with the collaboration of the TR@NSENER Consortium.

The aim of this conference is to present the challenges and opportunities faced in the electrical transmission and distribution systems due to the higher expected incorporation of renewable energy sources into the energy system. Different stakeholders from the academia, private companies and public entities will share their visions and experiences on how the electrical system could take appropriate advantage of different renewable energy sources.

## Thursday 17<sup>h</sup> May 2018

15.00 –  
15.15

**Registration**

15.15 –  
16.15

**Welcome speech (CTA / Tr@nsener)**

**Keynote speaker: State of the art, challenges & opportunities**

Vladimiro Miranda, INESC Porto

Antonio Gómez Expósito, University of Seville

16.15 –  
17.15

**Technological needs: vision of TSOs & Utilities**

Speaker to be confirmed, REE, RTE &/OR REN

Ignacio Laínez, EDP

Speaker to be confirmed, Endesa

17.15 –  
18.15

**Experience & vision of vendors, engineering companies and service providers**

Speaker to be confirmed, Abengoa

Speaker to be confirmed, GPtech

Santiago Blanco Polo, Ayesa

18.15 –  
18.30

**Conclusions**
